Always dial **911** for life threatening emergencies!

This is not a comprehensive list of medical services. Please contact a doctor with any medical concerns you may have.

Don't be fooled by popup emergency clinics!

Freestanding ERs are misleading, often charging patients UP TO 10X MORE than they would pay for the same services at urgent care centers. Be sure to confirm that the Urgent Care or Emergency Room you're seeking care at is In-Network before you receive care!
